ABOUT

Statistics grad from Hacettepe University. Been working as a Data Science consultant at Itech Information Technology on a Ministry of Trade project for 2 years, building ML models for customs fraud and smuggling detection. I mostly work with PySpark and Netezza. I have a publication in the Firat Medical Journal on Alzheimer detection. Currently developing in dbt and Snowflake, and exploring LLM/RAG on the side.

WORK EXPERIENCE

Data Scientist (Consultant) · Itech Information Technology

via Ministry of Trade · Ankara · May 2024 – Present

- ▶ Built and deployed ML models for customs fraud and smuggling detection on imbalanced datasets. Used SAS Viya 4 for this.
- ▶ Did optimization work on PySpark; learned many of the do's and don'ts working with Spark in production.
- ▶ Wrote SQL queries and handled data workflows on DB2 and IBM Netezza.
- ▶ Worked with the customs enforcement and investigation teams to translate their needs into ML-based risk scores. **10,000+ active investigations** are now prioritized through the model.

AI R&D Intern · ArVis Technology

Istanbul · Jul – Sep 2023

- ▶ Worked on 3D asset generation with generative AI models, integrated them into render pipelines.
- ▶ Wrote image processing applications with OpenCV (background removal, asset preprocessing).

AI Intern · Simovate

Istanbul · Jun – Sep 2022

- ▶ Built predictive maintenance models on sensor data using ARIMA and LSTM.
- ▶ Did data preprocessing, feature engineering, and model development with TensorFlow, Keras, Scikit-learn, and PostgreSQL.

TECHNICAL SKILLS

Programming: Python, R, SQL, SAS

ML / DL: Scikit-learn, TensorFlow, Keras, XGBoost, PyTorch (basics), AutoGluon

Data Engineering: PySpark, Apache Kafka, Apache Hive, Airflow, dbt (learning)

MLOps: Airflow, Docker, Git, CI/CD basics

Databases: PostgreSQL, MySQL, MongoDB, DB2

Visualization: Tableau, Matplotlib, Seaborn

EDUCATION

BSc in Statistics · Hacettepe University

2020 – 2024

Ankara, Turkey · Graduated: June 2024 · GPA: **2.76/4.0**

Relevant courses: Machine Learning, Statistical Inference, Time Series Analysis, Data Mining, Experimental Design, Bayesian Statistics

PROJECTS

Real-time Fraud Detection Pipeline (Ministry of Trade — production)

I took over this project and handled daily maintenance and improvements.

Alzheimer Detection on MRI Data · [DOI](#)

CNN-based MRI classification. Published in Firat University Medical Journal (2023). *Stack: Python, TensorFlow, Keras, TensorBoard.*

Boston Housing Price Prediction · [GitHub](#)

Compared AutoGluon models against linear regression. *Stack: Python, AutoGluon.*

PUBLICATIONS

Güneş, Y. et al. "Alzheimer Detection via Deep Learning on MRI Data." *Firat University Medical Journal*, 2023.
